NEW ACADEMIC DEGREE PROGRAM SUMMARY FOR PROGRAM ANNOUNCEMENT

Institution	Stockton University
New Academic Degree Program Title	Finance
Degree Designation	Bachelor of Science
Degree Abbreviation	B.S.

Introduction:

Stockton University recently celebrated its fiftieth year. Since its beginning as a small state college located on the boardwalk in Atlantic City, it has grown into a regional university offering undergraduate, master's, and doctoral degrees, that educates almost 10,000 students each year. Along the way, Stockton University has remained committed to offering a liberal arts education through interdisciplinary education. Stockton's Strategic Plan explains: "Stockton's liberal arts education pairs rigorous academic training with high-quality, co-curricular experiences to equip students not just for their first job, but also for long-term professional success, and a lifetime of learning, growing, and succeeding."

As Stockton University has grown, so have its offerings related to business studies. Currently, the Business Studies program sits in the School of Business, along with several other programs. In the 2021-2022 academic year, there were more than one thousand Business Studies majors, pursuing two-degree options: a Bachelor of Arts in Business Studies and a Bachelor of Science in Business Studies. Within the Bachelor of Science, students choose from six concentrations – Accounting, Business Analytics, Finance, Financial Planning, Management, and Marketing.

In this proposal, along with two companion proposals, the Business Studies program seeks to convert three of its existing concentrations (Accounting, Business Analytics, and Finance) into separate discipline-specific programs that offer their own Bachelor of Science degrees. The new majors will maintain the same curriculum, faculty, and other structures as the existing concentrations – the essential aspect of these proposals is simply to change the concentrations into stand-alone majors. This proposal focuses on the creation of a Bachelor of Science in Finance, which also includes a concentration in Financial Planning; the proposals for the Business Analytics and Accounting programs have been submitted concurrently.

Importantly, the creation of a Bachelor of Science in Finance aligns with several strategies Stockton plans to pursue as part of its current Strategic Plan, which focuses on six key areas: Inclusive Student Success, Diversity and Inclusion, Teaching and Learning, Strategic Enrollment

¹ Stockton University, "Strategic Plan 2025," https://stockton.edu/academic-affairs/documents/stockton-strategic-plan.pdf, at p. 9.

Management, Financial Sustainability, Campus Community, Communication, and Shared Governance.²

For example, under the area of Inclusive Student Success, Stockton plans to "[b]uild enrollment strategies that position Stockton as a first-choice academic home for a diverse, high achieving applicant pool." Creating a program that is focused solely on Finance will attract a wider array of prospective students to consider Stockton for their undergraduate degree. Finance degrees have become the standard in this field and students interested in Finance are looking for such degrees. Moreover, creating a stand-alone Finance degree will allow students to compare Stockton's program with peer programs at other well-regarded institutions via third-party rankings. At present, Stockton's Finance concentration does not appear in such rankings because of its status as a concentration within a major. This obscures the educational opportunities it offers to those interested in Finance, limiting the reach of the program.

Under the area of Teaching and Learning, Stockton plans to "[e]mbrace new academic programs and approaches that enhance teaching and learning, respond to changing social and economic conditions, and prepare students for emerging fields." Setting Finance apart as a stand-alone program will provide the faculty with greater flexibility to shape the program curriculum to meet the changing needs of this field.

As part of Strategic Enrollment Management, Stockton seeks to "[d]evelop enrollment and retention strategies at the institutional, school and program levels that account for our mission, market demand, cost, and capacity." As explained in greater detail below, setting Finance apart as a stand-alone program is consistent with market demand, as students and employers in the field expect such a degree for those pursuing a career in the finance field. The new Finance degree will help Stockton's School of Business maintain strong enrollment moving forward, particularly considering the relatively low cost of a degree at Stockton, a state university.

Finally, the new Finance degree is consistent with Stockton's mission, which is "to develop engaged and effective citizens with a commitment to lifelong learning and the capacity to adapt to change in a multi-cultural, interdependent world. As a public university, Stockton provides an environment for excellence to a diverse student body, including those from underrepresented populations, through an interdisciplinary approach to liberal arts, sciences and professional education." The new degree in Finance will provide a robust educational opportunity for those seeking to enter the finance field, with 80 credits focused on finance and related business topics, and 48 credits of non-business courses, including Stockton's general studies curriculum that ensures students have an interdisciplinary, liberal arts education.

Overview of proposed new academic degree program:

With its new Finance program, Stockton University seeks to transform its existing concentration in Finance within the Business Studies degree into a discipline-specific degree that is consistent

² Ibid., at 8-9.

³ Stockton University, "Mission Statement", at https://www.stockton.edu/president/mission-statement.html

with norms and expectations in the field of Finance. It will not result in substantial changes to the Finance curriculum. Rather, it will carry over the existing curriculum, which is similar to Finance programs across the country. Since the new program will retain the faculty from the Finance concentration and rely on the same administrative and facilities support, it will not require significant additional resources.

Stockton University is pursuing this change now for several reasons. In recent years, alumni, students, potential employers, and other stakeholders have expressed confusion and discontent regarding the name of the Business Studies degree. These stakeholders have stated that the current degree, "Business Studies" indicates a broad study of business, rather than a deep exploration of a specialized program, even for students who pursue a concentration. While the concentration in Finance does provide specialized education in Finance, akin to Finance programs elsewhere, the current degree name seems to obscure this reality. For example, because Finance is a concentration within the Business Studies program, students searching for Finance program information online or in publications on degree programs are not directed to Stockton; employers have a similar problem.

A stand-alone Finance degree will provide several additional benefits, including greater career opportunities for graduates, potentially growing enrollment in the program, allowing for greater curricular flexibility to meet the changing needs of the discipline, and greater visibility for the program, including enabling it to be included in comparative rankings with equivalent programs at other institutions. Stockton's current Finance concentration is missing from third-party program rankings.

Sufficient academic quality

The new Finance program will use similar curriculum, learning outcomes, and assessment methods as the existing Finance concentration. Stockton University's Business Studies program is accredited by the Association to Advance Collegiate Schools of Business (reaccreditation was recently awarded in Spring 2022). The new Finance program would remain under the Stockton University School of Business AACSB banner, and go through reaccreditation on a regular basis, which will continue to ensure that the program offers a high-quality education.

_

⁴ These sentiments have been expressed to Business Studies faculty members in a number of settings, including during meetings of Stockton's Business Advisory Board and the recent Presidential Task Force on a Strategic Pathway to Achieve Stockton University's Goal for Business and Hospitality Excellence in Atlantic City. See, e.g., Stockton University, "Presidential Task Force on a Strategic Pathway to Achieve Stockton University's Goal for Business and Hospitality Excellence in Atlantic City" (2020), https://www.stockton.edu/academic-affairs/task-force/documents/presidential-school-of-business-task-force-report.pdf.

Curriculum:

Stockton offers a 128-credit undergraduate degree. The Bachelor of Science in Finance will include 80 program credits and 48 "at-some-distance" credits that must be taken in non-business-related disciplines. The required program courses include:

Business Administration Core Courses	Cr	Finance Courses	Cr
CIST 1206 – Statistics	4	ACCT 3251 – Taxation of Individuals &	4
CIST 1200 Statistics		Entities	
ECON 1200 – Macroeconomics	4	ECON 3620 – Money & Banking OR	4
ECON 1200 – Wacrocconomics	4	FINA 3105 – Fin. Institutions & Markets	4
ECON 1400 – Microeconomics (ASD course)	4	FINA 3120 – Financial Management II	4
BUSA 2110 – Technology in Business	4	FINA 3121 – Investments	4
ACCT 2110 – Financial Accounting	4	Upper-level Finance Elective	4
ACCT 2120 – Managerial	4	Upper-level Finance Elective	4
BSNS 2120 – Introduction to Bus. Analytics	4	Upper-level Finance Elective	4
MGMT 2110 – Introduction to Management	4	Upper-level Business Studies Elective	4
MKTG 2110 – Marketing Principles	4		
PLAW 2120 – Bus. Law I <i>or</i> PLAW 3110 – Legal,	4		
Social, and Ethical Environ. of Business	4		
MGMT 3120 – Operations Management	4		
FINA 3110 – Introduction to Finance	4		
BSNS 4112 – Business Policy & Strategies	4		

The curriculum for the concentration in Financial Planning includes the following courses, which are consistent with the Certified Financial Planner course requirements:

Business Administration Core Courses	Cr	Financial Planning Courses	Cr
CIST 1206 – Statistics	4	FINA 3121– Investments	4
ECON 1200 – Macroeconomics	4	FINA 3125 – Principles of Insurance & Risk	4
ECON 1400 – Microeconomics (ASD course)	4	FINA 3131 – General Principles of Financial Planning	4
BUSA 2110 – Technology in Business	4	FINA 3132 – Retirement Planning	4
ACCT 2110 – Financial Accounting	4	FINA 3133 – Estate Planning	4
ACCT 2120 – Managerial	4	FINA 3134 – Financial Plan Development	4
BSNS 2120 – Introduction to Bus. Analytics	4	ACCT 3251 – Taxation of Individuals & Entities	4
MGMT 2110 – Introduction to Management	4	Upper-level Business Studies Elective	4
MKTG 2110 – Marketing Principles	4		
PLAW 2120 – Bus. Law I <i>or</i> PLAW 3110 – Legal, Social, and Ethical Environ. of Business	4		
MGMT 3120 – Operations Management	4		
FINA 3110 – Introduction to Finance	4		
BSNS 4112 – Business Policy & Strategies	4		

Among the 48 at-some-distance credits, all Finance students will have to take a variety of General Studies courses across a variety of disciplines, including GAH (Arts and Humanities), GNM (Natural Sciences and Mathematics), GSS (Social and Behavioral Sciences), and GIS (Interdisciplinary Skills and Topics).

Thus, the new Finance program's curricula (which are the same as the existing Finance/Financial Planning concentrations) are similar to Finance and Financial Planning programs throughout the country. The required coursework beyond the program courses ensures students experience the breadth of educational experiences that Stockton's liberal arts education offers. A curriculum worksheet and course descriptions for the courses listed above can be found in Appendix A.

Learning Outcomes:

The Finance program will adopt the existing learning outcomes from the Business Studies program, which include Fundamental Business Skills, Critical Thinking and Problem Solving, Ethical Reasoning Professional Communication, Teamwork and Inclusion, and Technology Agility, all of which can be found in Appendix B. The new Finance program will also establish a new discipline-specific learning outcome: *Graduates will apply and synthesize concepts learned throughout the Finance Program to demonstrate a level of professional competency required of a new entrant into the Finance profession.* Table B1 also shows how each learning outcome will be achieved in the courses required in the Finance program and the Financial Planning concentration.

Moreover, Stockton University has established a set of university-wide Essential Learning Outcomes (ELOs), which include: Adapting to Change, Communication Skills, Creativity and Innovation, Critical Thinking, Ethical Reasoning, Global Awareness, Information Literacy and Research Skills, Program Competence, Quantitative Reasoning, and Teamwork and Collaboration. Table B2 also shows how the Finance program's learning outcomes match with Stockton's ELOs.

Assessment:

Assurance of learning is an integral part of the academic environment in Stockton University's School of Business. Accordingly, assessment of student outcomes will be conducted systematically and routinely by the new Finance program. The program will utilize the School's recently revamped assessment policies and procedures. Assessment amongst Business programs is led by the Business Program Assessment Committee, which works with program chairs to oversee the assessment process. This includes tracking compliance with assessment timelines, evaluating assessment results, and ensuring that corrective actions are taken, and reassessment is completed when assessment results indicate that expected outcomes are not being met. The Assessment Process Timeline, the completion of which is overseen by the Assessment Committee, can be found in Appendix C.

A "close the loop" follow-up assessment conducted in Fall 2019 serves as a recent example of how assessment results are used to improve and inform curriculum decisions within the Finance Program. This assessment focused on the following outcome: "Graduates will be able to manage

the flow of funds within organizations". Specifically examining the topics of time value of money (cash inflows and cash outflows, present value of cash flows, annuities, future value of cash flows and loan payment), goals of long-term financial planning, working capital management, trade credit, and receivables management, with both original and follow-up assessments being conducted in FINA 3110: Introduction to Financial Management. The previous Fall 2016 assessment indicated the overall performance achieved for this learning goal showed 92.6% of the students met the group performance goal. Regarding one specific question, instructors for the course FINA 3110 would need to reinforce the concept of valuing multiple cash flows at different points of time as the average grade of this question was lower than the grades of the remaining questions during the Fall 2016 assessment. To address student performance on this specific concept, Finance faculty provided additional focus on this concept in class, including asking students to complete additional practice problems. The Fall 2021 Assessment produced much better results with an overall 93.8% of the students meeting the group learning goal. The average grade for the question valuing multiple cash flows at different points of time also improved from the last assessment.

Additional Methods for Measuring Success and Guiding Curriculum Change:

In recent years, the Finance concentration has enhanced its curriculum in response to other measures of curriculum effectiveness. For example, in Spring 2020, finance faculty members took the initiative to review the Finance and Financial Planning curricula and benchmarked 14 competing universities. Finance faculty also sought advice from Stockton Business Advisory Board. The curriculum review was to examine whether the course offerings were up to date with the finance field. This review led the faculty to change the curriculum so that Budgeting would no longer be required (this made Stockton's finance concentration align with peer institution's finance programs). Additionally, a Financial Derivatives course was added in Fall 2021. The updated Finance curriculum provides students with in-depth knowledge in corporate finance and investment analysis. For students who concentrate in financial planning, curriculum is aligned with the Certified Financial Planner Board of Standards so graduates can take the CFP exam and become a Certified Financial Planner.

As demonstrated in the previous examples, Business Advisory Board feedback, benchmarking as well as studying business and industry trends, provided guidance for the curriculum changes noted above. In addition to rigorous assessment activities, program success will be evaluated in several other indirect ways including:

- Evaluation of the students' feedback on IDEA reports (student evaluation of teachers)
- Discussions with students during preceptorial advising
- Feedback gathered from students in exit surveys
- Feedback from external stakeholders and focus group panels
- Number of job placements and feedback from those employers through Office of Career Education & Development surveys

Sufficient evidence of labor market demand for the program

Varying sources of data suggest that the labor market demand for Finance remains strong, as do starting salaries for Finance professions. The U.S. Bureau of Labor Statistics (Table D1) projects 6% growth in the financial analyst field from 2020 to 2030 and lists the 2021 median salary of \$81,410.⁵ Other employment opportunities for finance graduates are similarly promising. For example, budget analysts have a median salary of \$79,540 and can expect 5% growth this decade, while financial examiners have a median salary of 81,410 and will see 18% growth by 2030.⁶ For 2021, the *U.S. News & World Report* ranks the job of financial managers #7 on its list of best jobs and #2 on its list of best business jobs, citing 17.3% growth in job opportunities between 2020 and 2030.⁷

Moreover, an analysis of Gray Associates Data for the New Jersey market was conducted of student demand and employment. Student Demand is very strong with a score of 32 (99th percentile), indicating that this major enjoys a high level of interest. Inquiry and search volume are stable. Employment is also very strong with a score of 20 (99th percentile). BLS 10th percentile annual wages are \$53,424 (meaning 90% of accountants and auditors earn a higher salary). The BLS mean wage in finance is \$98,705. The results of the Gray Associates Data Analysis can be found in Appendix D. Additionally, Stockton University is located within 90 minutes of New York City and Philadelphia metropolitan areas, which have the first and eighth highest employment levels for financial and investment analysts, respectively. Moreover, New Jersey is listed as one of the top states in terms of mean annual wage for financial and investment analysts. 9

Students who choose the financial planning concentration also will see promising job prospects. The Bureau of Labor Statistics reports a median salary of \$94,170 and 5% growth between 2020 and 2030. ¹⁰ Importantly, the New York and Philadelphia metropolitan areas rank first in terms of highest employment levels. ¹¹

Moreover, the skills developed by students in finance programs, which include analysis, organization, critical thinking, interpersonal communication, adaptability, time management,

industry knowledge, spreadsheet proficiency, team collaboration, and writing, prepare them for a variety of other professional paths. Thus, students who graduate with degrees in Finance are prepared to take on different roles throughout the business sector, due to the broadly applicable skills that are developed in these programs.

Duplication with comparable programs of study in the State

The proposed conversion will not create any additional duplication with ongoing programs at other colleges in New Jersey, as it is merely changing an existing concentration in Finance to a discipline-specific degree. The Bachelor of Science degree in Finance at Stockton would be a similar program to those offered at other universities in New Jersey. However, since Stockton's Finance and Financial Planning concentrations have existed for many years with significant enrollment, transitioning to a Finance degree will not change the number of available programs in the state. Rather, it puts Stockton's program on similar footing with most programs in New Jersey and beyond. Appendix E shows existing Finance programs and concentrations in New Jersey, along with other regional, comparable programs.

Requirement of significant additional State resources

The six existing B.S. Business Studies concentrations (Accounting, Business Analytics, Finance, Financial Planning, Management, and Marketing) and the B.A. in Business Administration are already administered as part of the School of Business's faculty, facilities, and budget. Accordingly, there will be no additional operating expenses, library expenses, and office/staff requirements. To confirm there will be no new faculty hiring requirements directly related to the transition from concentrations to degrees, we examined the 2020 AACSB standards for deployment and faculty qualification for Finance, along with the proposed Business Analytics and Accounting programs, and the remaining Business Studies concentrations. Appendix F features a table that confirms each discipline-specific degree exceeds the AACSB 60% deployment requirement and the 75% overall undergraduate requirement. The second table in Appendix F confirms each proposed discipline-specific degree exceeds the AACSB 40% Scholarly Academic (SA) requirement and the combined 90% overall requirement. Therefore, moving from concentrations to discipline-specific degrees will not require the hiring of any additional faculty to support our AACSB accreditation.

The only additional resources required by the creation of this program relates to the need for a program chair. Currently within Business Studies, there is a program chair, who also serves as the Associate Chair for Accounting, along with Associate Chairs for the other concentrations (Business Analytics, Finance, Marketing, and Management). With the creation of the Accounting, Business Analytics, and Finance programs, three new chairs will be created in Fall 2024 to replace existing associate chairs. Appendix G outlines the increase in chair compensation totaling \$34,295. Additionally, the reduced size of the Business Studies program will cause a change to the compensation for chairs of other programs in the university, pursuant to the Fall 2024 tier calculation cycle outlined in the local agreement between Stockton University and the Stockton Federation of teachers. The administration is aware of the projected increase and has indicated their support.

APPENDIX B

LEARNING OUTCOMES FOR B.S. in FINANCE

1) Finance Specific Learning Objective

Graduates will apply and synthesize concepts learned throughout the Finance Program to demonstrate a level of professional competency required of a new entrant into the Finance profession.

2) Fundamental Business Skills

Graduates will be able to perform fundamental business skills in management, finance, accounting, marketing, and business analytics.

- A. Graduates will be able to apply current management and administrative practices and theories.
- B. Graduates will be able to manage the flow of funds within organizations.
- C. Graduates will be able to organize, record, and report business transactions.
- D. Graduates will be able to utilize the interrelationships between customers, products, and companies to guide effective decision making.
- E. Graduates will be able to apply theories and skills of statistical data analysis and management science to support decision-making processes.

3) Critical Thinking and Problem Solving

Graduates will be able to diagnose problems in various business situations, gather and analyze relevant information to understand the problems, and select and implement appropriate solutions and evaluate outcomes.

4) Ethical Reasoning

Graduates will be able to demonstrate ethical reasoning by recognizing moral dilemmas, analyzing their effects on stakeholders, and applying ethics theories to determine alternative solutions to those dilemmas.

5) Professional Communication

Graduates will be able to communicate effectively in a professional environment.

- A. Oral communication: Graduates will be able to deliver information in a persuasive, logical, and organized manner with a professional demeanor using appropriate visual aids.
- B. Written communication: Graduates will be able to create informational, analytical, and technical documents that are organized and concise, and incorporate credible sources.

6) Teamwork and Inclusion

Graduates will be able to work effectively with various stakeholders in increasingly diverse and global business environments.

- A. Graduates will be able to interact effectively with team members.
- B. Graduates will be able to contribute their expertise to collaborative projects.
- C. Graduates will be able to recognize and implement inclusive and equitable business practices in diverse business environments.

7) Technology Agility

Graduates will be able to use technology to support performance in varying business situations.

- A. Graduates will be able to select and use appropriate technology to gather, analyze, and interpret data to solve business problems.
- B. Graduates will be able to adapt to emerging technologies.
- C. Graduates will be able to identify ethical issues related to the use of technology and data, including privacy and security.

APPENDIX C BUSINESS STUDIES ASSESSMENT COMMITTEE ASSESSMENT TIMELINE

	Team Leader for Course Assessment of a particular Learning Objective		
Role:	(LO), in a particular course, in a particular semester, SHOULD:		
Semester before:	Review previous assessment activities / instruments for same LO	Plan	
	Repeat/Revise/Redo assessment instrument	Do	
	Get discipline faculty approval for assessment instrument	Check	
	Set up evaluation matrices	Act	
	Set assessment goals		
	Get buy-in for administration to all sections (including adjuncts)		
	Report to disciplinary faculty on or before 2nd precepting day		
	Report to Assessment Committee that "ready to go" by 2nd precepting day		
Semester of:	Oversee administration (in all sections)		
	Collect student data/enter into evaluation matrices		
	Get results/compile statistics		
	Make recommendations (course changes, curriculum changes, other changes, task forces, instrument changes*)		
	Discuss with discipline faculty at *end-of-semester meeting		
	For course or discipline level recommendations, get disciplinary buy-in, develop implementation plan (including responsible person)**		
Semester after:	Report results in start-of-semester program faculty meeting		
	For course or discipline level recommendations, deliver close-the-loop evidence to assessment committee ASAP		
	* Jan for Fall assessments, May for Spring Assessments (before retreat)		
	**Feb BSNS meeting for Fall assessments, Retreat for Spring assessment		
	mmendation to come from this assessment activity is to change the assessment assessment in subsequent semester	instrument, the	n redo
