Dear Colleague:

Computer Science and Information Systems program is proposing to offer two degrees in CSIS: 1) B.S in Computer Science (CS) and 2) B.S. in Computer Information Systems (CIS). Mathematics program strongly support this proposal.

Mathematics program has been working closely with Computer Science program for many years. We offer service course and cross listing course to each other. With this new proposal under the recommendation of ABET consultants, mathematics program can further provide the needs to two different fields in computing.

Mathematics program does not anticipate the sudden and heavy impact due the new proposal. The courses involved in this proposal include Calculus I, II, III, Discrete Math, and Linear Algebra. Mathematics program has prepared the enrollment increase on these courses five years ago.

Computer Science program's proposal is clearly offering an accurate representation of what CS program can offer. Recognizes Computer Science, and Information Systems as two interrelated sub-disciplines in the field of Computing.

Mathematics program has discussed the proposal and support it strongly. As the coordinator of Mathematics, I strongly support this proposal. Please feel free to contact me if you have further question.

Sincerely,

Chia-Lin Wu, Ph.D.
Professor of Mathematics
Mathematics Program Coordinator
