UNIVERSITY | SCIENCES & MATHEMATICS

Biology Program | BIOL

ABOUT THE PROGRAM

Stockton's **Biology (BIOL) Program** offers courses and degrees that prepare students for a variety of careers in biological science, provide a background of skills and knowledge needed for further study in graduate schools, and promote enjoyment and appreciation for the organisms that populate our planet.

The biology faculty members are dedicated to teaching our students the most up-to-date facts, perspectives, and methodologies in the field of biology with pedagogical approaches that will enhance the learning experience. In addition, our faculty members engage in scholarly research in which students can take part with independent studies. These unique, personalized independent studies often lead the way to interesting career paths or further graduate education. Our faculty's research and teaching expertise spans the broad discipline of biology, including ecological and evolutionary relationships, molecular and cellular studies, and physiological and behavioral studies of organisms.

Our Biology Program offers a Bachelor of Science (B.S.) or Bachelor of Arts (B.A.) degree with concentrations in specialized areas, allowing students to customize the biology courses to fulfill degree requirements.

Degrees and Concentrations:

- Biology B.A. or B.S. (General)
- Biology B.A. (Education)
- Biology B.S. (Biotechnology)
- Biology B.S. (Pre-Physical Therapy)
- Biology B.S. (Pre-Physician Assistant)
- Biology B.A. or B.S. (Pre-Professional Studies) which includes:
Pre-Medical, Pre-Dental, Pre-Veterinary, Pre-Optometry, Pre-Podiatry, and other health professions.
- Minor in Biology

BIOLOGY PROGRAM STRENGTHS

Our faculty have diverse scholarly interests and a commitment to undergraduate education, providing a broad educational experience in the biological sciences, and opportunities for faculty mentoring and undergraduate research. In addition, the Environmental Studies, Marine Science, Chemistry, Math, and Physics programs offer additional faculty and opportunities for students to explore and expand their interest in biology. The biology program's interdisciplinary approach enables students to customize their coursework to align with their interests and career goals.

Our graduates have gone on to careers working in: Research laboratories, Education (K-12 or higher education), Health Care (Medical, Physician Assistant, Nursing, Dental, Physical Therapy, Optometry, Veterinarian, Pharmacy, Podiatry, Chiropractic), Environmental or Conservation Management, Laboratory Medical Science, Government Agencies, Science Museums, Zoos, Nature Centers, and Forensic Science.
